

# BMI Grout 3000 psi

## Product Description:

BMI 3000 is a sand cement grout to fill concrete block or door frames.

## Coverage:

One 80 lb. bag of BMI 3000 makes approximately 0.8 cu. ft. of grout. BMI 3000 is also available in bulk in our silo mixing station. One ton of BMI 3000 makes approximately 19 cu. ft. of grout.

## Mixing:

BMI 3000 contains all ingredients in dry form, only water needs to be added. Mix one bag of BMI 3000 with approximately 2 gallons of clean water to a pourable consistency

## Application:

Mix grout to a pourable consistency for block and a plastic-like consistency for use with trowel in bond beams and door frames.

## Manufacturer:

**BMI Products of Northern Illinois, Inc.**

## Specifications:

Grout 3000 psi

### Proportions:

Portland Cement Type I	ASTM-C150	1 Part
Sand	ASTM-C144	3 Parts

### Test Results:

		<i>Compressive Strength</i>	
		<u>7 days</u>	<u>28 days</u>
Slump:	11"	2603	3572
		2517	3490
		2535	3514

*-These are laboratory tests according to ASTM C-476 and are simulating the strength in the wall—when tested in prisms (not cylinders). Field tests from cylinders will be lower due to the fact that no water absorption has taken place.*
